Precision Agriculture

On Demand Economy

Location Data is Everywhere...

Spans across multiple different industries, segments and use-cases.

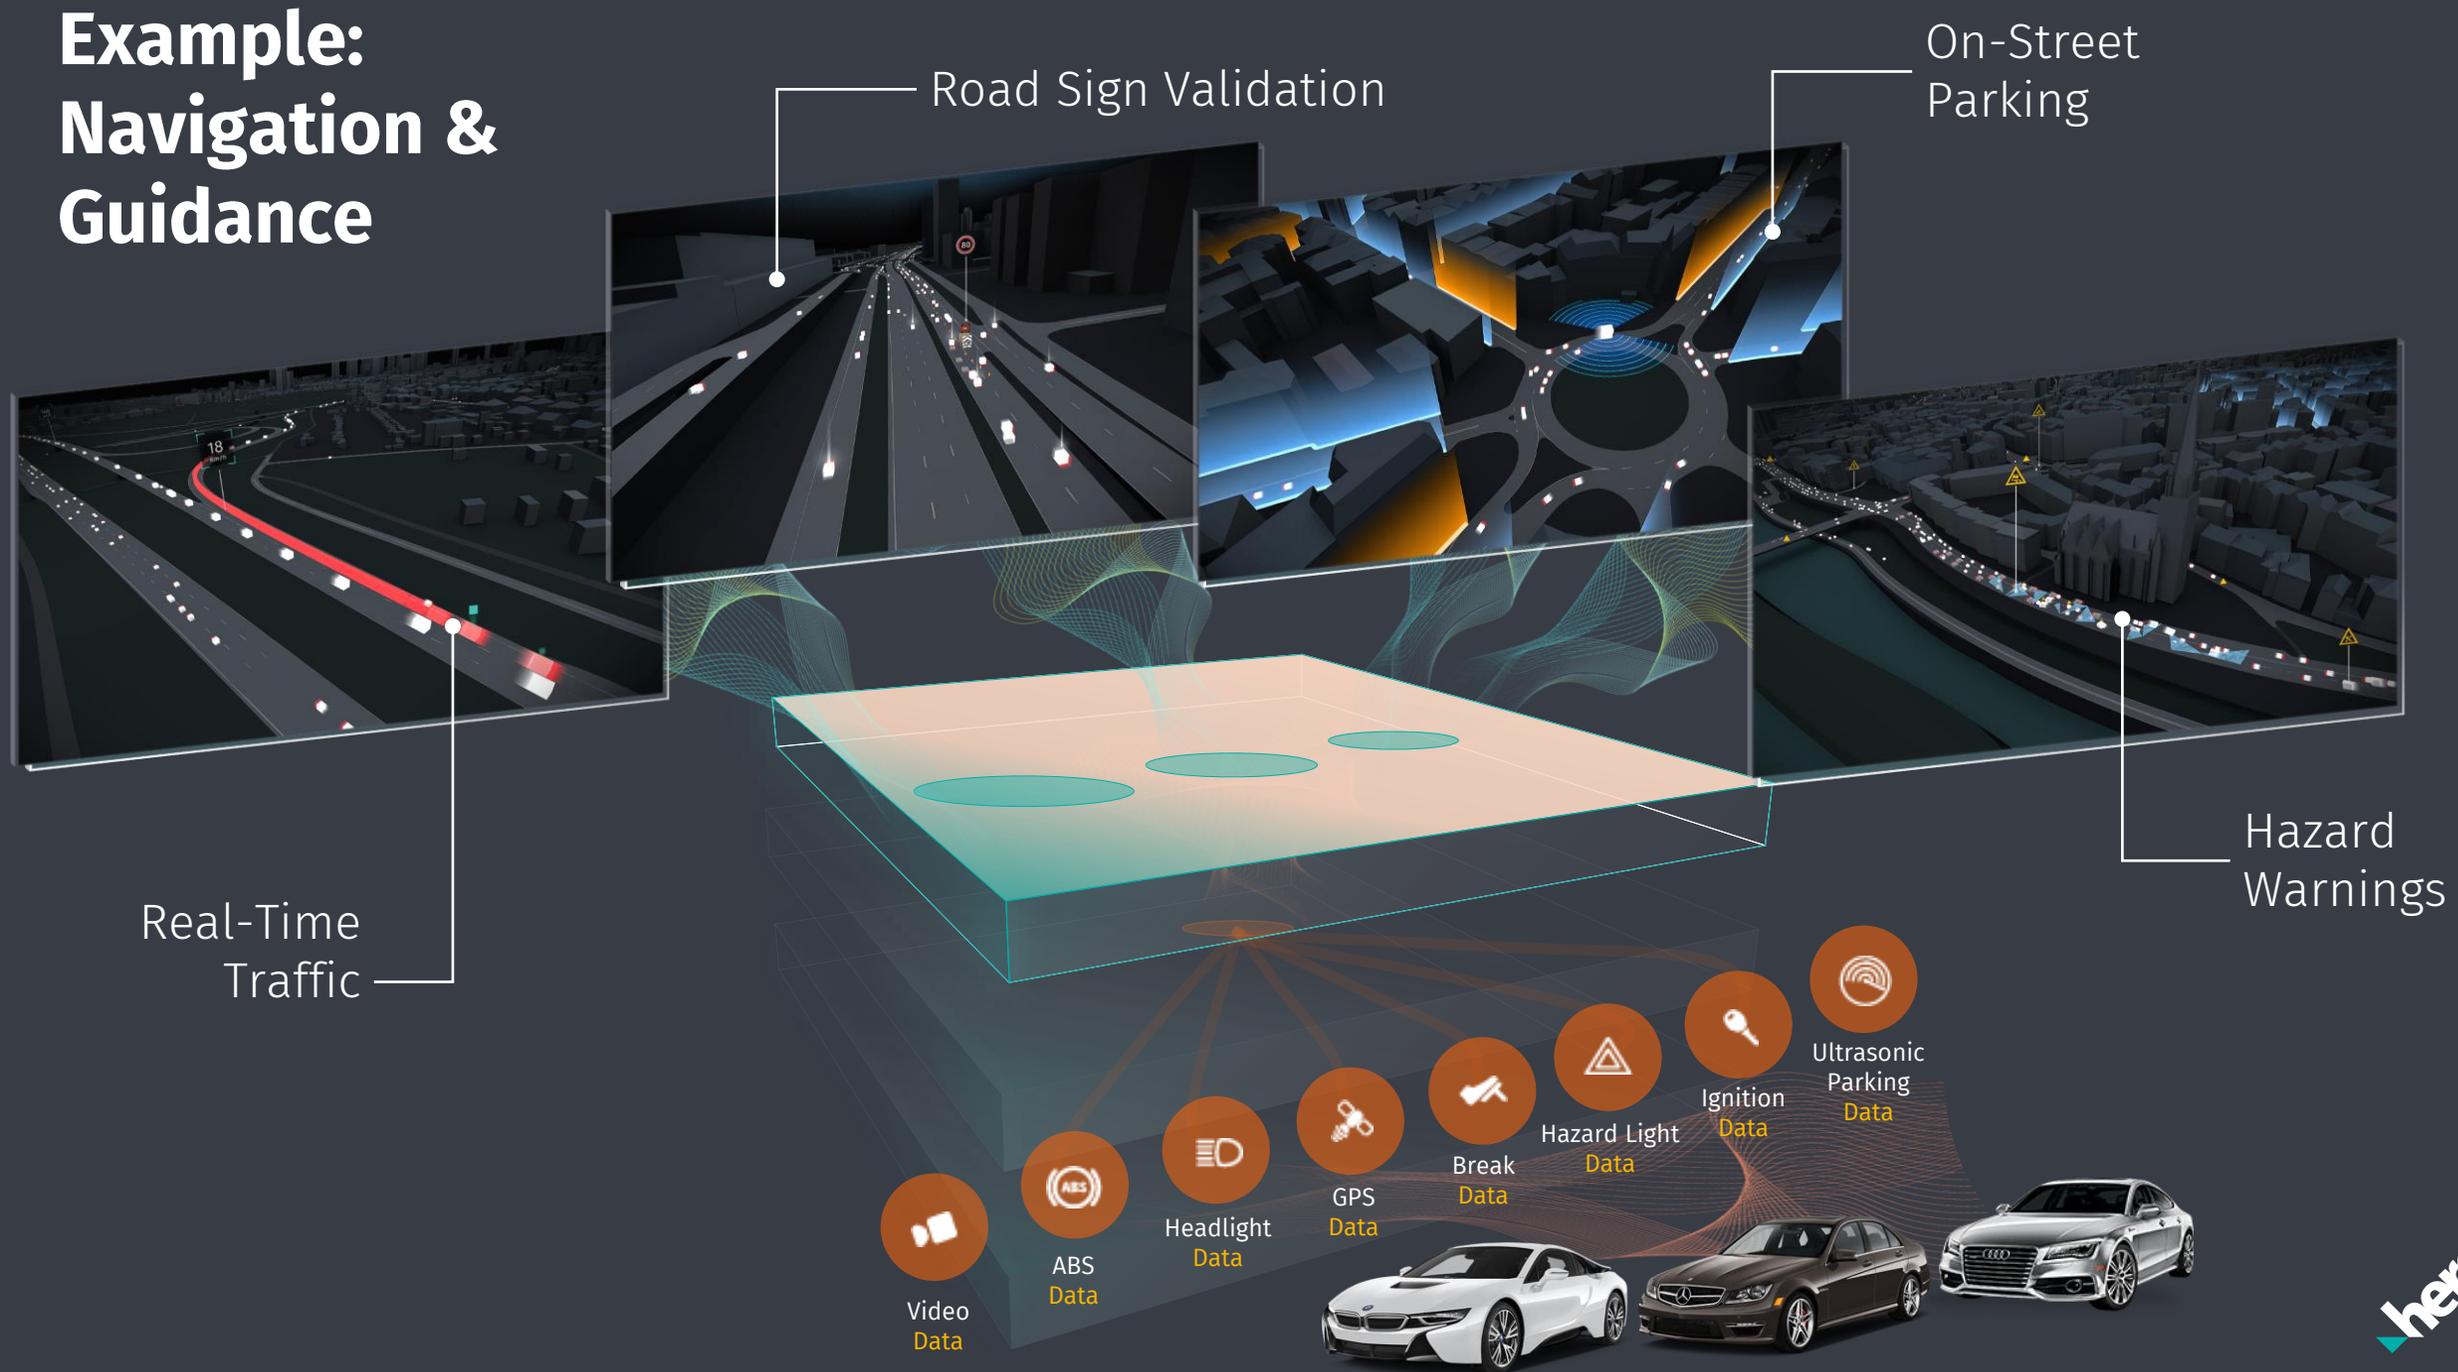

Connecting Data Silos

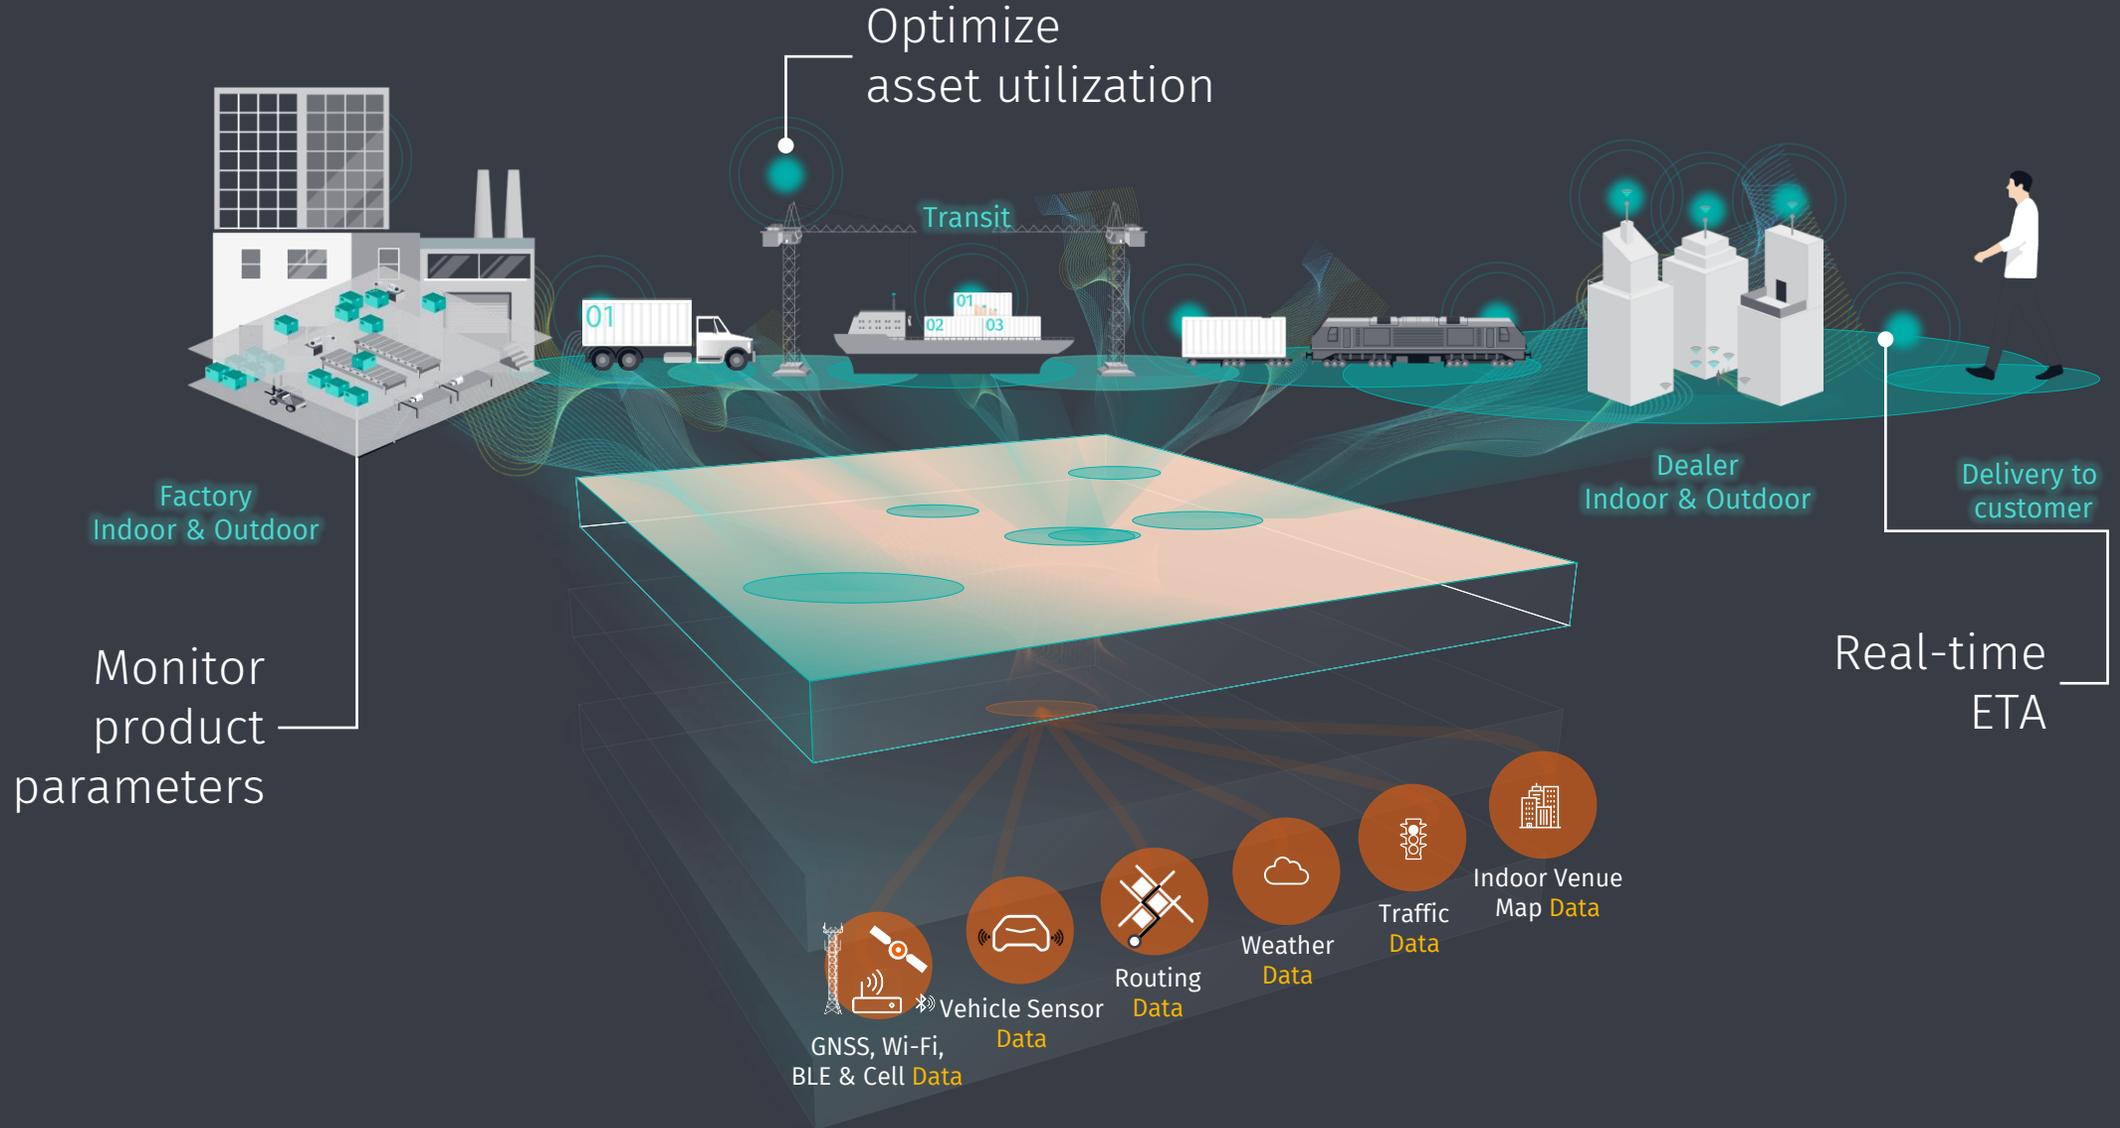

Location data will increase 50X

Example: Navigation & Guidance

Example: Next Generation Supply Chain Management

No single Government, Company or Individual can do it alone.
Collaboration is KEY to enabling an Open Location Ecosystem

Example of Logistics Optimisation

Decreasing
congestion from
deliveries

With data and analytics tools to understand, quantify and influence consumer demand-related congestion

Collaboration
throughout the
supply chain

Thank you
